How to Writing Good Test Cases:

- When you are writing test cases some points, you have to keep in mind that like write the test case in such a way that in each step it will test one thing at a time. don't make it complicated by testing multiple things in a single test scenario.
- Try to cover both positive and negative test cases, so that it will help to provide a quality product to the users, and also it helps the organization.
- Try to write the test cases in a simple word that every word can easily understand.
- Write the test steps in a passive voice like do this. Do that, and it should be.
- When you writing test steps try to use the exact name for the fields.
